

ScholarsGallery — Investor Pitch Deck

Seed Round | AUD \$250,000 Australian Investment Network — Proposal 1619143

SLIDE 1 — Cover

ScholarsGallery *AI-Powered Training for Australia's Aged Care Workforce*

Seed Round: AUD \$250,000 Platform: iOS App Store (Live on TestFlight) Market: Australian Aged Care + Digital Art Commerce

[Logo / App Icon] Confidential. For accredited investors only.

SLIDE 2 — The Problem: A Workforce in Crisis

Australia's Aged Care Workers Are Undertrained

"Over 60% of residential care workers have received no formal dementia-specific training." — Royal Commission into Aged Care Quality & Safety, 2021

Three compounding problems:

- **Skills gap** — Trauma-aware, dignity-centred communication is the #1 unmet training need identified by the Royal Commission
- **Access gap** — Existing solutions cost AUD \$400–\$1,200/worker/year; micro-learning on the care floor is practically impossible
- **Engagement gap** — Web-based LMS platforms see <30% completion rates; workers need engaging, personalised, offline-capable training

The Opportunity

366,000 aged care workers. One in three will need retraining by 2027.

SLIDE 3 — The Solution

ScholarsGallery: AI Training That Goes Where Workers Go

On-device. Offline-capable. Personalised. AUD \$14.99/month.

Built on Apple Intelligence — on-device AI means: - Zero cloud inference cost - Private, HIPAA/privacy-safe by design - Instant responses, no connectivity required

SLIDE 4 — Product: What Workers See

The Learning Experience

Study Coach (AI-Powered Tutor)

"Last time you studied dignity-first dementia communication. Continue? Or try a quick-start on trauma-aware de-escalation?"

Workers tap once → personalised flashcard session begins → adapts in real time to their responses

5 Core Modules (Year 1 roadmap): 1. Trauma-Aware Communication on the Care Floor (*built*) 2. Dignity-First Dementia Support (*built*) 3. Co-Design with Families and Carers (*built*) 4. Palliative Care Communication (*roadmap*) 5. Cultural Safety in Aged Care (*roadmap*)

Daily micro-learning: 3–7 minutes per session No scheduling. No LMS login. No desktop required.

SLIDE 5 — Product: The Full Platform

Two Revenue Streams, One App

ScholarsGallery iOS App

—

AGED CARE MONITOR —> AUD \$14.99/mo

On-device AI flashcards

Dementia/trauma curriculum

Study Coach (Apple Foundation Models)

—

CREATIVE STUDIO —> AUD \$19.99/mo

AI image generation + "Dola" assistant

Curated exhibition galleries

Scholarship essays (art + care philosophy)

Digital art collection & marketplace

Why bundle them? - Aged care workers also have creative lives — the app serves the whole person - Single App Store listing = lower CAC, higher retention - Premium positioning vs. single-purpose competitors

SLIDE 6 — Market Size

Australia's Aged Care Training Market

Segment	Size
Residential aged care workers	~230,000
Home care workers	~136,000
Registered aged care providers	~2,700
Royal Commission compliance pressure	Ongoing mandatory training reforms

Target (Year 3): 2% of residential workforce = **4,600 Monitor subscribers** **Revenue at target:** ~AUD \$830,000 ARR (Monitor only)

Creative/Studio Market (upside)

- AI creative tools: USD \$1.4B globally, 38% CAGR
- Australia: ~1.2M active art market participants

- Target 0.1% penetration = 1,200 Studio subscribers → ~AUD \$290,000 ARR

Combined TAM (Australia alone): AUD \$15M+ annually

SLIDE 7 — Traction & Validation

Where We Are Today

✅ **Full app built and live on TestFlight** ✅ **47 automated tests passing** — CI/CD pipeline to TestFlight ✅
Production API live at `api.scholarsgallery.app` ✅ **CloudKit sync, StoreKit 2 subscriptions, admin panel** — all implemented ✅ **Accessibility wired** — WCAG compliance for care setting deployments

Early Signal

- Beta testers: care workers, aged care educators, art collectors
- Core curriculum (3 Monitor modules) reviewed against Royal Commission recommendations
- No enterprise training app on the App Store combines AI + dementia-specific curriculum

What Investment Unlocks

- App Store public launch (TestFlight → Production)
 - 2 additional curriculum modules with clinical review
 - Direct outreach to top 50 aged care providers
-

SLIDE 8 — Business Model

Simple, Recurring, High-Margin

Product	Price	Margin	When
Monitor Monthly	AUD \$14.99/mo	85%	Ongoing
Monitor Annual	AUD \$119.99/yr	85%	Upfront
Studio Monthly	AUD \$19.99/mo	85%	Ongoing
Generation Credits	AUD \$4.99 pack	85%	Ad hoc

Product	Price	Margin	When
Art Marketplace	Variable	85%	Ad hoc

App Store handles: - Billing & renewals - Fraud & chargebacks - International pricing - Receipt validation

We keep 85% (Apple Small Business Program, ≤\$1M revenue)

SLIDE 9 — Go-to-Market

Three-Phase Launch

Phase 1: App Store Launch (Months 1–3) - TestFlight → public App Store release - ASO: keywords targeting "aged care training app", "dementia care training iOS" - LinkedIn content series for ACSA, LASA professional networks - PR in *Australian Ageing Agenda*, *Aged Care Insite*

Phase 2: Facility Pilots (Months 4–9) - Personal outreach to top 50 residential providers (Bupa, Estia, Regis, Opal, Bolton Clarke) - 3-month free pilot (50 workers per facility) → group licensing conversion - Target: 5 pilots × 80 workers = 400 subscribers from partnerships alone

Phase 3: B2B Scale (Month 10+) - Volume licensing: AUD \$8/worker/month (50+ seats) - LMS API integration for facility management systems - Expansion to New Zealand, UK (same curriculum, same app)

SLIDE 10 — Competition

No One Does What We Do

Competitor	Training	AI	Offline	iOS-Native	Aged Care Specific
ScholarsGallery	✓	✓	✓	✓	✓
Altura Learning	✓	✗	✗	✗	✓
Dementia Australia eLearning	✓	✗	✗	✗	✓
Generic mLearning (EdApp etc.)	✓	Partial	Partial	Partial	✗
Midjourney / DALL-E	✗	✓	✗	✗	✗

Moats: 1. On-device AI (Apple Foundation Models) — no recurring cloud inference cost 2. Clinical-grade dementia/trauma curriculum 3. Integrated art + scholarship layer creates emotional engagement 4. Operator admin panel enables B2B deployment without enterprise IT

SLIDE 11 — Team

Built to Ship

Founder / CEO - Deep iOS platform expertise: SwiftUI, Foundation Models, CloudKit, StoreKit 2 - Full-stack: built production API (Vapor/Swift), CI/CD pipeline, TestFlight deployment - Personal connection to aged care: founding motivation rooted in direct care experience

Hiring (seed funding) - Head of Content & Clinical Partnerships — curriculum development, ACSA/LASA relationships, Royal Commission compliance alignment - **Growth & Partnerships Lead** — facility sales, App Store ASO, digital marketing

Advisory (in discussion) - Aged care nursing educator (TAFE/Uni sector) - iOS apps for health (regulatory experience)

SLIDE 12 — Financials at a Glance

3-Year Trajectory

AUD	Year 1	Year 2	Year 3
Subscribers	484	1,665	3,266
Net Revenue	\$70,228	\$248,546	\$532,403
Operating Costs	(\$201,249)	(\$317,400)	(\$426,800)
EBITDA	(\$131,021)	(\$68,854)	\$105,603

Break-even: ~Month 26 **Seed + revenue runway:** 30+ months at base case

Unit Economics (Monitor)

- LTV (12-month): AUD \$153
- CAC (organic): AUD \$45
- **LTV/CAC: 3.4x (Year 1) → 5.5x (Year 3)**

SLIDE 13 — The Ask

AUD \$250,000 Seed Round

Structure: SAFE note at AUD \$2.5M post-money cap

Use of Proceeds:

Priority	Amount	Why Now
🎓 3 additional curriculum modules	\$95,000	Content depth required for facility deals
📢 App Store launch & marketing	\$62,500	ASO + sector PR drives organic installs
👉 Facility partnership delivery	\$37,500	Pilot program converts to ARR
⚙️ Infrastructure & legal	\$37,500	API scaling + APRA compliance review
💰 Working capital	\$17,500	Buffer

Milestones this raise unlocks: - ✅ App Store public launch - ✅ 3 facility pilots confirmed (400+ workers) - ✅ 500 paying subscribers - ✅ AUD \$70,000+ ARR

SLIDE 14 — Return Pathway

How Investors Make Money

Likely exit scenarios (Years 3–5):

Acquirer Type	Why They'd Buy	Comparable
Altura Learning / CompliSpace	Adds AI + mobile to their LMS	EdTech vertical M&A
Medibank / nib / BUPA Aged Care	Workforce capability as product	HealthTech adjacency
Private Equity (aged care roll-up)	Training compliance as asset	Platform economics
Apple	On-device AI healthcare training showcase	Strategic/rare

Return modelling (base case): - Year 3 ARR: AUD \$532,000 - Exit at 5× ARR: AUD \$2.66M - Investor return at \$2.5M cap: ~1.1× (2× on bull case) - At 6× ARR Year 4 (\$1M ARR): ~2.4× return

Upside is capped at this stage — we are offering early entry at founder-friendly terms to the right aligned partner.

SLIDE 15 — Why Now

The Window Is Open

Three forces converging in 2025–2026:

1. **Regulatory:** Australian Government aged care quality reforms mandate ongoing workforce training — providers are actively seeking compliant, scalable solutions
2. **Technology:** Apple Foundation Models (iOS 18) enable on-device AI that was impossible 18 months ago — first-mover advantage in this specific niche
3. **Market:** No AI-native, clinical-grade, mobile-first training app exists for Australian aged care workers — the category is wide open

Act now or watch it close: - Clinical content takes 12–18 months to build; we have 3 modules done - App Store organic ranking compounds over time; launch early wins - Facility relationships are relationship-driven; seed now funds the BD

SLIDE 16 — Call to Action

Let's Build the Standard for Aged Care Training

ScholarsGallery is ready to deploy. The app is built. The curriculum exists. The market is waiting. We need a partner to take it to scale.

Next steps: 1. Review financials and business plan (enclosed) 2. TestFlight demo available under NDA 3. Video call with founder — 30 minutes
